## Description - Main menù

---

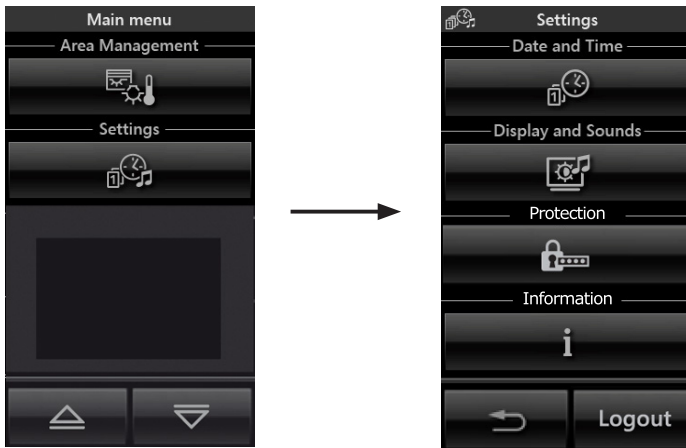

### 1. DESCRIPTION.

Colour 4.3" touchscreen for control and command, Well-contact Plus, complete with mounting frame for installation in boxes of 8 modules.

### 2. MAIN MENU'

Once the touch screen has been configured with the Touchscreen Configurer software, the opening screen is displayed containing the various sections for the control/command of the whole system.

Touching the icon  gives access to the Settings menu.

## Main menù

---

### • Date and Time

By touching the  icon it is possible to set the time and date to be displayed. With the  e  impostare il valore evidenziato fino a portarlo al giorno, mese, anno e orario desiderato.

### • Display

When the  icon is touched the display shows the screen that allows you to adjust the backlighting and the contrast of the display.

This is set by holding your finger on the  and  icons until the desired level is reached.

## Main menù

---

### • Keys Tone

With the  and  icons it is possible to enable or disable the acoustic signal (beep) which accompanies the touching of the icons displayed by the touchscreen.

### • Temperature Unit

With the  and  icons it is possible to select the unit of measurement with which the touchscreen will display the temperature in the various areas of the system.

To confirm the settings made, touch the  icon.

To return to the previous screen touch the  icon.

### • Protection

By touching the  icon you can set a password with which you select whether to inhibit access to all the menus or only to the Settings menu.

With the  icon you activate or deactivate protection of all the menus.

With the  icon you access the window that allows you to set the desired password.

## Main menù

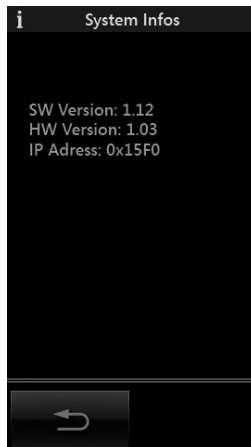

---

After making the desired settings (Menu Protection and/or PIN change) simply touch the OK icon of the Protection menu.

- **Information**

Touching the  icon on the screen shows the software release and the main characteristics of the touchscreen.

## Area management

---

### 3. AREA MANAGEMENT.

From the main menu, when the icon  is touched the display is shown which allows you to select the different areas of the system and to control the devices associated with them (lights, roller shutters, HVAC, etc.).

For example, when the icon  is touched that corresponds to the area called "Ground Floor", the touch screen displays the following screen:

## Area management

---

- Touching the icon  switches on/off and adjusts the lighting called “Corridor Light”.
- Touching the icon  lifts and lowers the roller shutter called “Roller shutters”.
- Touching the icon  gives access to the screen which allows you to adjust the temperature in the area called “Ground floor”. The screen content depends on the type of system used in which there may or may not be a fancoil.

The temperature can be varied only in a certain range of values that is defined in the thermostat via the ETS software.

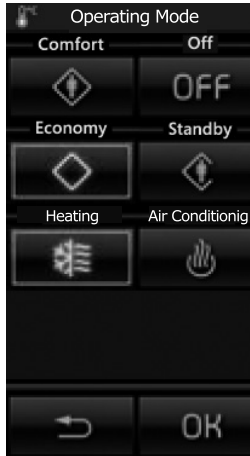

The above also applies in the case of operation in protected and non-protected modes.

## Area management

---

- Touching the  icon displays the screen which allows you to set the operation (Comfort, Standby, etc.) of the heating/air-conditioning system for the area called Ground Floor.

In the case of operation in protected mode it will be possible to set only the Comfort and OFF options.

- Touching the  icon activates the scenario called Entrance; the same applies to all the other icons associated with the different scenarios displayed.
- Touching the  and  icons scrolls through the whole screen for the groups and scenarios of the selected area.
- Touching the  icon gives access to the screens for all the other areas of the system.

## Weather station

---

### 4. WEATHER STATION.

If the Vimar weather station is installed in the system, the touchscreen displays the measured data in a specific screen.

Two examples of screens showing the data provided by the weather station are given below.

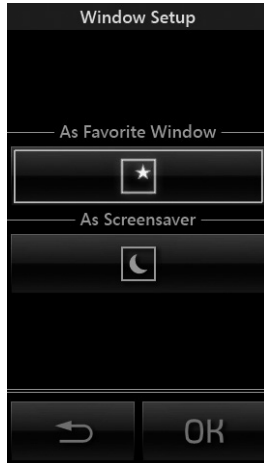

**Important:** The detailed screens for each thermostat may vary according to the characteristics chosen by the installer during configuration; for example, it is not always possible to adjust the temperature or select the operating mode.

## Screen saver - Cleaning - Conformity

---

### 5. SCREEN SAVER.

When you touch the icon for some pages, e.g. the main menu, pages for the areas, etc., a screenshot appears that lets you choose whether you want to set the page you have selected as your home page or as your screen-saver (see figure on following page).

On viewing the screen that you want to set as "home" and touching the title of this page (for instance "Area Selection"), the following possibilities are available for selecting the screensaver:

- touching the icon on "As Home Page" will, after approximately one minute, turn off the touchscreen and the date and time display.
- touching the icon on "Come Salvascermo" (As Screensaver) will, after approximately one minute and regardless of the position in the menus, load the home page and lower the backlighting of the touchscreen to the value set as "Retroilluminazione Standby" (Standby Backlighting).

### 6. CLEANING THE TOUCHSCREEN.

Periodically clean the touchscreen with a soft, dry cloth. Do not use any solvents or detergents.

### 7. CONFORMITY.

EMC directive.

Standard EN 50428, EN 50090-2-2.
